

# ENERGY ECONOMICS for HAWAII BUSINESS ADVISORS

## Workshop Announcement

As team leader for the Island of Hawaii MSRI Partnership, Hawaii Electric Light Company (HELCO) is pleased to announce two upcoming 1/2-day workshops by the Renewable Energy Development Institute aimed at helping financial professionals working with businesses understand the economic costs and benefits of installing solar and other energy technologies.

Detailed information and resources including a Resource Guidebook and companion CD developed by the Renewable Energy Development Institute (REDI) of California will be distributed to workshop participants. Prior contracts from the US Department of Energy, the National Renewable Energy Labs, the California Energy Commission, and the National Solar Energy Industries Association have placed REDI at the forefront of energy economics.
